## PROFILE

I am a client-oriented software developer with a proven track record of delivering engaging web projects. My expertise spans the entire development stack, encompassing front-end technologies such as HTML, CSS, and JavaScript, as well as proficient back-end development using Django and the MERN stack. I thrive in collaborative team environments and am recognised for consistently providing impactful solutions.

My key strengths lie in critical thinking and the ability to identify project vulnerabilities, which has contributed significantly to my professional growth and my value to organizations. I am dedicated to continuous improvement, actively acquiring new skills aligned with organisational needs. Additionally, I am committed to pursuing relevant qualifications to advance my career and contribute meaningfully to organisational success

## EMPLOYMENT HISTORY

### Security Officer, The Security Hub
Melbourne

Jan 2020 — Feb 2023

- Collaborated closely with fellow officers to ensure effective security coverage.
- Successfully resolved conflicts and maintained professionalism, ensuring client satisfaction.
- Fostered a positive team spirit while addressing various challenges, resulting in improved client happiness.
- Gained valuable insights into collaboration, diplomacy, and the importance of client-centric service.

### Administrator, Fighters Xpress
Melbourne

Dec 2017 — Jan 2020

- Managed data, memberships, and addressed customer inquiries
- Mastered time management techniques to enhance overall efficiency.
- Cultivated positive customer interactions and created a welcoming environment.
- Recognised the significance of customer satisfaction and the impact of friendliness on business success.

## PROJECTS

### Pass The Pigs - Dice Variation  GitHub | website
Jul 2023 — Jul 2023

Developed a fully responsive website utilising HTML, CSS, and JavaScript for the Pass the Pigs dice game variation.

### Workout Routines Web Application  GitHub | website
Jul 2023 — Aug 2023

Led the development of a comprehensive full-stack project designed to manage workout routines. Users can seamlessly log in, add individual exercises, and create custom workout routines.

### Dino Park - Productivity Timer App GitHub | website
Aug 2023 — Aug 2023

Designed and implemented Dino Park, a web application that gamifies the popular Pomodoro technique to boost productivity. Users have the opportunity to build their virtual "Dino Park" by hatching dinosaur eggs during focused work sessions.

### The Emporium - Marketplace for rare collectibles GitHub | website
Sep 2023 — Sep 2023

Architected and developed a full MERN stack project with comprehensive CRUD functionality, establishing a dynamic platform catering to rare collectible enthusiasts.
